Introduction: Where Permaculture and Science Meet	1
Kindergarten: An Introduction to Gardening	13
Fall: Getting to Know the Garden	15
Winter: Pollination and Seeds	26
Spring: Insects and Garden Species	36
First Grade — Grade One: Seeds	49
Fall: The Edible Parts of Plants	51
Winter: Traveling Seeds	60
Spring: Sprouting Seeds Experiment	69
Second Grade — Grade Two: Pollinators and Cycles	79
Fall: Seasons and Garden Changes	81
Winter: Beneficial Insects and Birds	90
Spring: Observing Pollinators	100
Third Grade — Grade Three: Becoming Soil Scientists	111
Fall: The Garden Ecosystem	113
Winter: Soil Vitality Experiment	122
Spring: Fostering Healthy Soils	133
Fourth Grade — Grade Four: Vermicomposting	143
Fall: Becoming a Worm Expert	145
Winter: Mini Worm Bin Project	154
Spring: Worms Help Grow a Healthier Garden	163
Fifth Grade — Grade Five: Composting	173
Fall: Composting Basics	175
Winter: Compost in a Jar Experiment	184
Spring: Healthy Soils and Garden Plants	195
Sixth Grade — Grade Six: Rain Gardens	205
Fall: The Way Water Moves	207

Winter: Rain Garden Design	216
Spring: Building a Rain Garden	222
Leadership and Stewardship	231
Seventh Grade — Grade Seven: Renewable Resources	235
Fall: Catching and Storing Energy	237
Winter: Valuing Renewable and Natural Resources	246
Spring: Using Small and Slow Solutions.	253
Eighth Grade — Grade Eight: Leadership and Stewardship.	261
Fall: Energy Cycles and Conservation	263
Winter: Designing Systems.	271
Spring: Supporting Biodiversity	280
Endnotes	287
Appendix A: Next Generation Science Standards	289
Appendix B: Resources	293
